

Git and GitHub guide

You will do these steps every time you make changes to your branch to save them in the GitHub repository on your branch. when you finish let me know then I will merge your changes to the main branch

• **BEFORE YOU WORK MAKE SURE THAT YOU ARE IN YOUR BRANCH.**

If you are **not** in your branch, use this command in the terminal

git checkout your branch name

else

git pull origin main // to be updated with the main branch

Enter // press Enter

Work on the project

Adding your work to your branch in the repo

git add . // to add all changes that you made

Enter // press Enter

git commit -m "لوسمحت اكتب كومت واضح وشامل" // to put a comment about the changes that you made

git push origin your branch name

let me know and thank you
